

Project Opening Ceremony and Press Conference

Motto: Improvement of the monitoring system - prevention of the environmental damage; protection of the population's and wildlife's health

On February 28, 2014, after the completion of the successful procurement; the acquisition of the professional devices and equipment could be carried out; these devices are to be placed in the environmental laboratory of the Inspectorate. Measured devices and equipments are to be used as soon as the implementation and staff training is completed. Therefore, these are part of the professional in their day to day running tasks.

The Inspectorate realized the Opening Ceremony on 9th December 2014.

Mr. Ambassador Jean-Francois Paroz, from the Embassy of Switzerland and Mr. Max Schnellmann, the Head of the Swiss Contribution Office (hereinafter: SCO) presented in the Opening Ceremony. The SCO, the National Coordination Unit, the Intermediate Body and the press was represented as well.

After the greetings and the presentation of the project's outcomes participants viewed a measurement vehicle. At the launching event the measurement vehicle has provided data about the air quality; it measures the dust density level which is higher in the autumn/winter period due to meteorological factors. Furthermore it provides information about the air's gas components and it secures sampling taking for further lab examination.
